Subject: January 19 CAG meeting agenda topics and request

Dear Chris and Jaco,

I'm contacting you about the upcoming January 19 CAG meeting.

The CAG asked if Chris could give a longer and more detailed presentation about the Area 40 remedial action groundwater, soil vapor and ambient air data. Chris gave an overview of the Area 40 sampling at the November meeting and the CAG expressed interest in getting more detailed information. Is it possible for Aerojet to prepare a more detailed presentation on short notice? We'll work with the CAG to get these requests out sooner in the future.

For the 2021 Five-Year Review, the CAG expressed concerns that certain areas are being cleaned up to commercial or industrial levels in OU5 even though residential development is planned. Janis will lead this discussion. She's asking Daewon and Chris to discuss and answer questions preferably with maps. Daewon would appreciate Chris' help when discussing (and identifying) subareas of OU5 and the specific plans for those parcels.

Janis is asking DTSC to present on LUCs. Daewon has emailed Jim about this topic, but DTSC may ask you to co present.

Thanks,
Grace
